  - Clear sports drinks

Clear fruit-flavored drinksStrained fruit juices, no pulp

- Carbonated and non-carbonated soft drinks

- Jell-O, popsicles, hard candy
- ~ Add water to the fill line on the bottle. Shake well to mix solution and refrigerate.

#### Approximately 5pm to 6pm:

#### \*First Dose\*

- 1. Begin drinking the solution. Drink 8 oz. every 15 minutes until ½ of the solution in the bottle is complete (2L).
- 2. You may continue clear liquids until retiring.

## **Day of exam:** 8 hours before your appt, take **\*Second Dose\*** (at \_\_\_\_a.m.)

1. Drink 8 oz. every 15 minutes until the remainder of the bottle is complete (2L).

#### Discontinue liquids 6 hours before your exam.

#### You are ready for the exam:

- ~ You may take your regular medications with small sips of water.
- Wear comfortable clothing and leave all valuables at home. Plan 2 hours for the study.
- ~ Please be sure to bring your insurance information with you to facilitate registration.
- You must have someone drive you home as you cannot drive for at least 12 hours.
  A taxi or ride share service is unacceptable.

SPLIT-DOSE PREPARATION FOR COLONOSCOPY

(Please read carefully)

These instructions use a split-dose (two-dose) regimen, which has been shown to cleanse the colon (lower intestine) better than other methods. The cleaner the colon, the less likely an exam would have to be repeated earlier than usual. Most importantly, a cleaner colon increases the chances of finding any significant abnormalities, such as polyps.

For some patients, this split-dose regimen may require staying up late into the evening or awakening early in the morning to complete the preparation with the second dose. We know this may be inconvenient, but it is very important to clean the colon as best as possible.

The exact timing of the early evening (5pm-6pm) first dose is not as important as the timing of the second. The most effective cleansing occurs when the second dose is taken 6 hours before the colonoscopy. Please finish the preparation and all clear liquids 4 hours before the examination.

Tips: Alcohol-free baby wipes, Vaseline, over-the-counter hydrocortisone creams, hemorrhoid treatments, all may be used to ease skin irritation. If you feel nauseous or vomit, rinse your mouth with water, take a 15 minute break, and then continue to drink the solution. Even if you are sitting on the toilet, continue to drink the solution as per instructions.
